AM22 Rear Fitment 110/80VB18 Specification 12071 (date code 1308)

Dear Sir / Madam,

The production batch of specification 12071 noted above has been manufactured so that the arrows showing the direction of rotation are incorrectly displayed.

For this batch only, the tyres require mounting with the direction of rotation arrows pointing the opposite direction to the actual rotation of the wheel. This will result in the pattern of the tyre facing the correct way.

The tyre in the photo is fitted correctly.

If you have any questions regarding the correct fitment of the tyre please contact:
